

MASKS - MADE IN GERMANY

WE DELIVER

MADE IN GERMANY

”

BY PRODUCING HIGH-QUALITY MASKS, WE ARE HELPING TO MAKE GERMANY AND EUROPE LESS DEPENDENT ON INTERNATIONAL MANUFACTURERS.

The decision to enter a new field of business arose from our decades of experience and extensive technological expertise in custom machine construction. So we developed a high-performance machine for the production of high-quality FFP2 respirator masks, which enables us to respond to global demand.

ONE PARTNER.

CAPABILITY

WHO WE ARE.
WHERE WE COME FROM.

”

WITH US, EVERYTHING IS ENTIRELY
‘MADE IN GERMANY’: FROM THE NON-
WOVEN MATERIAL TO THE PACKAGED
PRODUCT.

Schneider Technologies is a medium-sized owner-run business based in Lennestadt in south-western Germany. Over decades we have earned an excellent reputation internationally in the development of leading technological custom machines for assembly and production process automation. Our customers have come to value our quality, dependable delivery and reliability.

QUALITY

Our particle-filtering respirator masks (FFP2/EN 149 and EN 14683) meet the highest criteria for legally prescribed hygiene guidelines. When developing our machine, we collaborated with renowned organisations, including the RWTH Aachen Institute of Textile Technology (ITA), the Protect Institute (Siegen University) and Weber Ultrasonics.

QUANTITY

Our high-performance custom mask production machine, which we developed in-house, has an output of 360 masks per minute. With three production lines, we are able to manufacture and individually pack around 90 million respirator masks per year.

AVAILABILITY

Thanks to our technological expertise in custom machine construction, we are able to minimise our machine downtime. As a result, our production performance rate is an impressive 98 per cent.

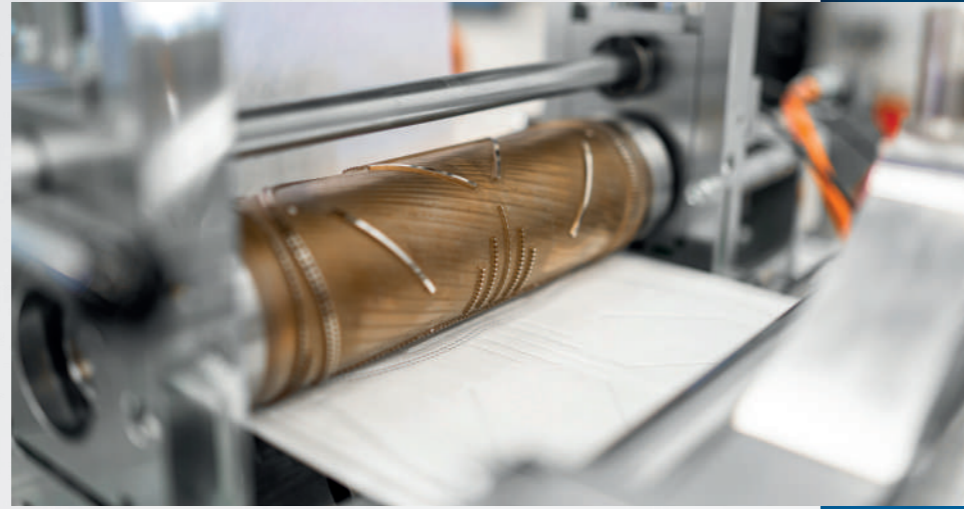

OUR CLAIM

A detailed view of a complex industrial manufacturing line for respirator masks. The machinery is primarily silver and blue, with various rollers, guides, and structural frames. A white fabric strip is visible, being processed by the equipment. The background is slightly blurred, showing more of the factory environment. The overall lighting is bright and clean, emphasizing the precision of the machinery.

**PERFORMANCE FOR
YOUR SUCCESS**

We can manufacture and deliver high-quality respirator masks in large quantities, individually packed. Our products meet the highest standards for FFP2 masks. This way we are helping support the sustainable supply of protective masks in Germany and around the world.

OUR MASK, 100% MADE IN GERMANY

We started developing our mask at the beginning of the pandemic, with the clear goal of creating a safe and high-quality mask. One of our biggest aspirations in the development process was to make a mask that is 100% Made in Germany. We achieved our goal with our mask by only using materials that are Made in Germany and getting a CE certification from a German institution.
